TA-101 Grey Tile Adhesive - Floor Grade

Economical, cement-based tile adhesive ideal for ceramic floor tile installation in interior spaces.

Features: Easy to apply, decent bond strength, slip resistance.

Recommended For: Standard ceramic floor tiles only.

Application: Ceramic floor tiles - Interior

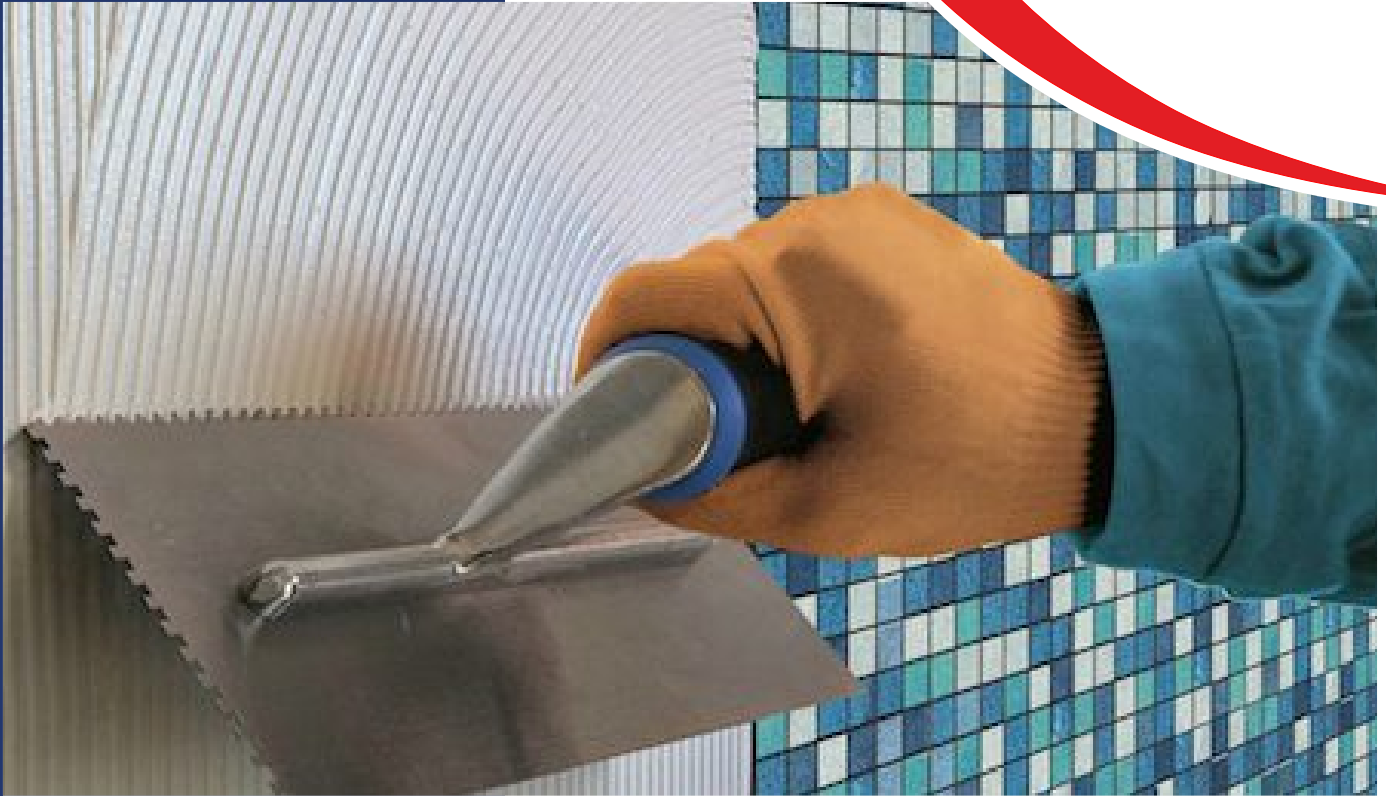

CATEGORY:
C1T

Testing Parameters Table

Packaging Size: 20 & 40 kg. Bag

| Product Code | Open Time | Pot life | Adjustability Time | Shear Adhesion (28 days) | Slip Resistance | Coverage (Approx.) | Water Resistance | Flexibility |
|--------------|-----------|----------|--------------------|------------------------------|-----------------|------------------------------|------------------|-------------|
| TA-101 | 15–20 min | 3–4 hrs | 15–20 min | ≥ 0.5 N/mm ² | ≤ 0.5 mm | 4–5 m ² per 20 kg | Moderate | Low |

TA-202 Standard Tile Adhesive

Ideal for fixing ceramic, vitrified, and porcelain tiles up to 2x2 ft on interior walls and floors.

Features: Enhanced strength, smooth consistency, better coverage.

Recommended For: Medium-size tiles for homes, commercial interiors.

Application: Wall & floor tiles (up to 2x2 ft) - Interior

CATEGORY:
G2TE

Testing Parameters Table

Packaging Size: 20 & 40 kg. Bag

| Product Code | Open Time | Pot life | Adjustability Time | Shear Adhesion (28 days) | Slip Resistance | Coverage (Approx.) | Water Resistance | Flexibility |
|--------------|-----------|----------|--------------------|------------------------------|-----------------|----------------------------------|------------------|-------------|
| TA-202 | 20–25 min | 4 hrs | 20–30 min | ≥ 0.8 N/mm ² | ≤ 0.5 mm | 3.5–4.5 m ² per 20 kg | Good | Medium |

TA-303 Premium Tile Adhesive

Engineered for all types of tiles of any size for both wall and floor applications, including vitrified and porcelain tiles.

Features: Polymer-modified, flexible, excellent adhesion & slip resistance.

Recommended For: Residences, commercial interiors, exteriors.

Application: Wall & floor tiles of any size - Interior & Exterior

CATEGORY:
C2TES1

Testing Parameters Table

Packaging Size: 20 & 40 kg. Bag

| Product Code | Open Time | Pot life | Adjustability Time | Shear Adhesion (28 days) | Slip Resistance | Coverage (Approx.) | Water Resistance | Flexibility |
|--------------|-----------|----------|--------------------|------------------------------|-----------------|------------------------------|------------------|-------------|
| TA-303 | 25-30 min | 4-5 hrs | 25-30 min | ≥ 1.0 N/mm ² | ≤ 0.3 mm | 3-4 m ² per 20 kg | Excellent | High |

TA-404 Heavy-Duty Tile Adhesive

High-strength adhesive for marble, granite, and heavy tiles. Designed for critical applications with heavy load.

Features: High tensile bond strength, superior flexibility, weather-resistant.

Recommended For: Large format marble, granite, stone, and tough exterior applications.

Application: Granite, marble, heavy tiles - Interior & Exterior

CATEGORY:
C2TES2

Testing Parameters Table

Packaging Size: 20 & 40 kg. Bag

| Product Code | Open Time | Pot life | Adjustability Time | Shear Adhesion (28 days) | Slip Resistance | Coverage (Approx.) | Water Resistance | Flexibility |
|--------------|-----------|----------|--------------------|------------------------------|-----------------|----------------------------------|------------------|-------------|
| TA-404 | 30-35 min | 5 hrs | 30-35 min | ≥ 1.5 N/mm ² | ≤ 0.2 mm | 2.5-3.5 m ² per 20 kg | Excellent | Very High |

BLOC-40 Block Joint Mortar

Pre-mixed, high-bond strength block joint mortar for all sizes of AAC, CLC, and fly ash blocks. Ensures reduced shrinkage, better workability, and crack resistance.

Features: Ready-to-use, easy application, high adhesive strength.

Recommended For: All block jointing in modern construction.

Application: AAC, CLC, Fly Ash blocks of all sizes

Testing Parameters Table

Packaging Size: 40 kg. Bag

| Product Code | Open Time | Pot life | Adjustability Time | Shear Adhesion (28 days) | Slip Resistance | Coverage (Approx.) | Water Resistance | Flexibility |
|--------------|-----------|----------|--------------------|---------------------------------------|-----------------|----------------------|------------------|-------------|
| BLOCKBOND-40 | N/A | 1 hrs | N/A | ≥ 0.7 N/mm ² (Block shear) | N/A | 140-150 blocks/40 kg | High | Moderate |

TILE GROUT Cement-Based Tile Grout

Product Description: NEXBOND TILEGROUT-C is a high-quality, polymer-modified cement-based tile grout for filling tile joints up to 4 mm width. It is designed for ceramic, vitrified, porcelain, mosaic, and natural stone tiles. The grout is available in a wide range of attractive, UV-stable colours that match popular tile designs.

Key Features:

- Smooth, non-shrinking formulation
- Easy to mix and apply
- Suitable for walls and floors, internal and external areas

Recommended Use:

- Residential kitchens, bathrooms, and flooring
- Commercial buildings, showrooms, malls

Coverage:

Approx. 50–60 sq. ft. for 2 mm joint per 1 kg depending on tile size and joint width

Shades Available:

Grey, White, Ivory, Black, Terracotta, Beige, Chocolate, Light Grey, etc.

Packaging Size: 1 kg. Pouch

WHITE CEMENT

Product Description: NEXBOND WHITECEM-1KG is a premium-grade white cement used for multipurpose interior and exterior applications. It offers a smooth, bright finish ideal for grouting, wall repairs, artistic finishing, and tile setting.

Key Features:

- Pure white finish with high brightness
- Quick setting and strong bonding
- Ideal for grouting and finishing work
- Can be mixed with pigments for colored finishes

Applications:

- Filling tile joints and cracks
- Minor surface repairs and patching
- White base for color applications

Coverage:

Approx. 40–50 sq. ft. per 1 kg (depends on thickness and surface type)

Shelf Life:

6 months from manufacturing if stored in dry, moisture-free condition

Storage:

- Keep sealed in original packaging
- Store in dry and cool area
- Avoid exposure to air and humidity

Packaging Size: 1 kg. Pouch

EPOXY TILE GROUTS

EPOXYGROUT-R: Regular Epoxy Tile Grout

EPOXYGROUT-G: Glitter/Sparkle Epoxy Tile Grout

Product Description: NEXBOND EPOXYGROUT-R is a high-performance, 3-component epoxy tile grout ideal for stain-resistant, waterproof, and chemical-resistant applications in both residential and industrial spaces. Available in over 45 elegant shades as per our shade card.

Key Features:

- High chemical resistance and stain-proof
- Water impermeable and hygienic
- Smooth, durable, and easy to clean

Applications:

- Ceramic, vitrified, glass mosaic, and stone tiles
- Food processing areas, malls, industrial kitchens
- Wet areas, commercial toilets, luxury residences

| Pack Size : 1 kg ₹ 1100/- | |
|---------------------------|---------|
| Resin | 200 gm. |
| Hardner | 100 gm. |
| Filler | 700 gm. |
| Total Net Content | 1 Kg. |

| Pack Size : 5 kg ₹ 3050/- | |
|---------------------------|-----------|
| Resin | 1000 gm. |
| Hardner | 500 gm. |
| Filler | 3.500 kg. |
| Total Net Content | 5 Kg. |

NEXBOND DAMPROOF

Product Description: NEXBOND DAMPROOF is an elastomeric acrylic waterproofing coating designed to resist water penetration on horizontal and vertical concrete surfaces. It forms a seamless, flexible, and long-lasting film that bridges cracks and protects structures from rain, UV, and weather impact.

Key Features:

- Excellent crack-bridging capability (up to 1mm)
- UV resistant & thermal reflective
- Excellent adhesion on cementitious surfaces
- Breathable coating with long-term durability

Applications:

- RCC roofs and parapets
- Cement plastered walls
- External wall waterproofing
- Bathrooms, balconies, podiums

Coverage:

2 coats: 2.0–2.5 m² per litre (depending on surface)

Shelf Life & Storage:

- Shelf life: 18 months in sealed condition
- Store in a dry, cool place away from sunlight

Packaging Size: 1L / 5L / 10L / 20L

NEXBOND PU TILEFIX

Product Description: NEXBOND PU TILEFIX is a premium-grade 2-component polyurethane-based adhesive system specially designed for the permanent fixing of natural stone, marble, granite, tiles, and panels on various surfaces such as concrete, metal, wood, and glass. Suitable for interior and exterior applications.

Key Features:

- Exceptional adhesion to any surface (even smooth or non-porous)
- Excellent flexibility and resistance to vibration
- 100% waterproof and heat-resistant
- Long open time and easy application

Applications:

- Natural stone, vitrified, ceramic & glass tiles
- Metal, wood, concrete, plastic & composite panels
- Vertical & horizontal applications (floor & wall)

Coverage:

- 1 kg covers 2 to 3 sq. ft. depending on surface and thickness

Shelf Life & Storage:

- Shelf Life: 12 months (in sealed condition)
- Store in a cool, dry place between 5°C to 35°C
- Keep away from direct sunlight & moisture

Packaging Size: 500g / 1kg / 5kg

NEXBOND LW PLUS

Product Description: NEXBOND LW PLUS is a high-performance liquid waterproofing additive specially designed for cement concrete, mortar, and plaster. It improves the cohesive strength, reduces permeability, and increases resistance to water penetration in construction applications.

Key Features:

- Integral waterproofing action
- Minimizes shrinkage and hairline cracks
- Improves durability and bonding
- Reduces efflorescence

Applications:

- Roof slabs and screeds
- Internal and external plaster
- Basement walls
- Water tanks & sunken portions
- Cement sand mortars and concrete

Coverage:

- 1 litre covers approx. 100 sq.ft. in plaster depending on mix and surface.

Shelf Life & Storage:

- 18 months in sealed condition
- Store in cool, dry place away from sunlight and moisture

Packaging Size: 500ml / 1L / 10L / 20L

SBR LATEX

Product Description: SBR LATEX is a high-performance SBR latex additive used for waterproofing, concrete repair, bonding old to new concrete, and improving the flexural strength of mortars and screeds.

Key Features:

- Improves adhesion and bonding
- Enhances water resistance
- Prevents cracking and shrinkage
- Increases durability of plaster and concrete
- Easy to mix and apply

Applications:

- Roof Slabs • Bathrooms • Water Tanks • External Walls
- Plaster Repair

Coverage:

- Approx. 25-30 sq.ft per litre as a bond coat (may vary with surface)

Shelf Life & Storage:

- Store in a cool, dry place. Shelf life: 12 months in unopened pack.

Packaging Size: 500ml / 1L / 5L / 20L

Packaging Size: 180gm. & 90gm.

RESIN HARDENER

Super strong bond: With stands heavy loads and extreme conditions.

Waterproof & Chemical Resistant: Perfect for tough environments.

Multipurpose Use: Ideal for industrial, construction, and household applications.

Heat & Impact Resistant: Ensures long-lasting durability.

Easy mixing & Application: Smooth consistency for hassle-free use.

How to Use:

1. **Surface Preparation:** Clean and dry the surfaces before application.
2. **Mixing:** Take 2 part of Resin & 1 part Hardener by weight & mix thoroughly until uniform.
3. **Application:** Apply the mixture on the surface and join immediately.
4. **Curing Time:** Initial setting in 30-60 minutes, full strength in 24 hours.

FILLER POWDER

Nexbond block fix is a versatile thin jointing a polymer fiber integrated grey cement composition based adhesive for fixing blocks & bricks fix on it comes in a premixed, ready to use & specially designed to provide stronger, durable bonding between the blocks with optimum adhesive strength.

Suitable for

It is recommended masonry wall preparation by jointing all type of AAC blocks, fly ash bricks.

Technical specification

Packaging Size: 730 gm. Bag

| Parameters | Appearance | Pot life | Water Ratio | Tensile Adhesion (28 days) | Shear Adhesion (28 days) | Coverage (40 kg bag) | Block size in mm |
|----------------|-------------|-----------|-------------------------|-------------------------------|-----------------------------|-------------------------|------------------|
| Specifications | Grey powder | >60 mins. | 25% By Weight of Powder | 0.80 N/mm ² | 0.75 N/mm ² | 210-230 Sq. Ft. | 600x200x75 |

CPVC CEMENT
